...

Thanks, I'll get the Detailed Comments cleaned up and ready to go per your feedback.

Re: the cover letter, I sent you and Kathleen a mark-up showing where we made changes to OFA's edits, along with the final clean version, last Thursday at 5:44pm. Would you like me to re-send that?

-Kathy

Kathleen and I went over the marginal notes, and I have provided responses in track changes in the attachment. I don't know why everyone's comments show up as "author" instead of by name, so I've started mine with "LH" so you know which ones are from me. Here's the bottom line:

∇ Keep text as is re: habitat restoration and BOR program.

∇ Clarify 100% renewable energy is their goal.

∇ Miscellaneous Comments – delete comment re: funding, and send remaining corrections separately (OK to include that EPA has not committed to funding the project with the other corrections).

Also, can you tell me whether the cover letter incorporated all of HQ's comments? If not, can

you similarly flag those and send back to Kathleen and me? Thanks.

Let me know if you have questions.

Kathleen –

Attached is the latest version of the Detailed Comments, which incorporates the vast majority of OFA's edits. While we accepted most of their deletions, we disagree with a few of them (some more strongly than others). For those, we inserted marginal notes for your consideration. Please see the marginal comments on pages 9, 15, 34, 36, and 37, and let me know how you would like us to proceed on those items.

I still have not received any notice from NMFS about their intention to prepare a Supplemental DEIS.
